Web Design

Lecture 0 - Course Introduction

Full name: Vu Trong Sinh

Degree: PhD, graduated from Japan Advanced Institute of Science and Technology (JAIST)

Research areas: Artificial intelligence, Machine learning, Natural language processing, Recommendation systems, Legal engineering

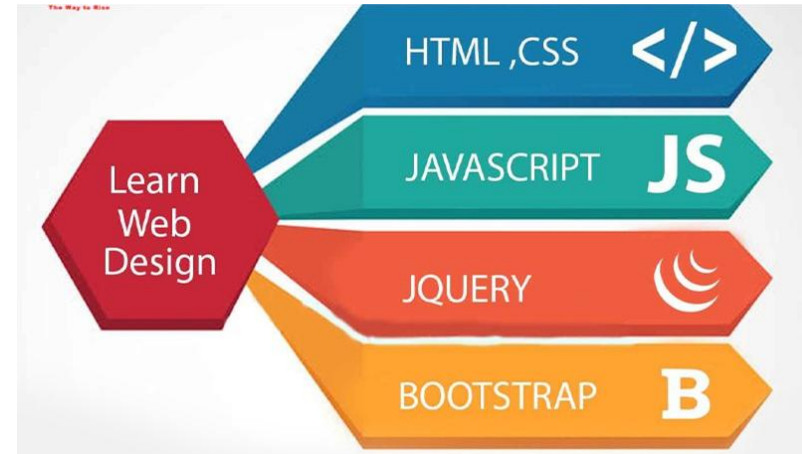

Email: sinhvt@hvnh.edu.vn

Mobile phone: 0975674039 (also Zalo account)

This subject provides students with basic and comprehensive knowledge about web designing, including **HTML, CSS, JavaScript** and modern web design technologies.

After completing the course, students will be able to *identify website layout elements, to analyze a web design project requirements, to apply appropriate web technologies to design a web prototype and to deploy the prototype to the Internet.*

Random attendance checking

- **Absent (A)**: without any permission
- **Late (L)**: ≥ 5 minutes late
- **Absent with permission (P)**: SMS/Zalo/Email before class hour

Quiz/test in/after class hour: ***no submission = 1 Absent***

Plus points for volunteer in the class or good question/answer in the LMS

Plus points for Teaching Assistant (TA)

Attendance score:

- 8 by default for normal student, 10 by default for TAs
- Absent = -0.5 Attendance score, Late= -0.2 Attendance score
- Contribution = +0.2 Attendance score
- Plus points for some homework exercises

Midterm 1: multiple choice test (HTML & CSS)

Midterm 2: multiple choice test (JavaScript & jQuery & Bootstrap)

Final exam: group project of 4 members

Chapter 1: Introduction to Web design

Chapter 2: HTML

Chapter 3: CSS basics

Chapter 4: CSS box model

Chapter 5: Web layout & Responsive design

Chapter 6: Fundamentals of JavaScript

Chapter 7: JavaScript & HTML DOM

Chapter 8: Web design frameworks

Chapter 9: Web deployment

Learning Web Design - A beginner's guide to HTML, CSS, Javascript, and Web Graphic, Jennifer Niederst Robbins, O'Reilly Media, 5th Edition, 2018

Mastering Bootstrap 4, Benjamin Jakobus, Jason Marah, Packt, 2nd edition, 2018

Websites:

- <https://www.w3schools.com/>
- <https://www.sololearn.com/>

There are many website hosting services that provide templates and drag-and-drop interfaces that make it easy to build a site without any code know-how.

***Name some of them
(Homework)***

For a comfortable web development environment, the following equipments are recommended:

- A solid, up-to-date computer
- A large monitor
- Other devices for testing:
A second computer,
Mobile devices
- Coding tools: VS Code, Sublime Text
- Designer tools: Figma, Adobe XD
- Other tools: browsers, FileZilla
